Profile Summary

Software Developer (SDE-2) with 2+ years of experience engineering enterprise platforms and production systems across frontend, backend, and platform layers. Experienced with complex applications deployed across cloud, on-premises, hybrid, and containerized environments, working across application servers, databases, APIs, caching, and CI/CD infrastructure. Strong in React.js, TypeScript, Java/Spring Boot, Node.js, Redis, Docker, and system-level debugging, with a solid foundation in operating systems, networking, databases, concurrency, and distributed systems.

Skills

Languages: JavaScript, TypeScript, Java, C++
Frontend: React.js, Next.js, Vite, Angular, Tailwind CSS, Material UI (MUI), HTML5, CSS3
Backend: Node.js, NestJS, Express.js, Spring Boot, REST APIs, JWT, Cookies, CORS
Databases: MongoDB, MySQL, PostgreSQL, Redis
DevOps & Infrastructure: Docker, Docker Compose, Jenkins, GitHub Webhooks, PM2, Linux (Ubuntu), Caddy, Nginx, JBoss, VPS Deployment
System Design: Reverse Proxy, Load Balancing, Rate Limiting, Caching, Health Checks, Fault Tolerance, Microservices, RBAC, Observability
CS Fundamentals: Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, DBMS, Concurrency, Distributed Systems, Computer Architecture, TCP/IP, HTTP/HTTPS, DNS, TLS, Virtual Memory, Processes/Threads
Tools: Git, GitHub, Postman, VS Code, GitHub Copilot, Claude, Codex

Experience

Newgen Software Technology Limited **Jul 2024 – Present**
Software Design Engineer (SDE-2) *Noida, India*

Engineered and enhanced **NewgenONE**, an enterprise low-code platform used across **banking, financial services, government, and regulated industries**, contributing across product modules, workflows, integrations, and platform capabilities.
Worked across the **full application stack** including React.js, Spring Boot, REST APIs, microfrontends, caching, and enterprise integrations, with data platforms such as **SQL Server, Oracle, PostgreSQL, and Redis**.
Supported diverse enterprise deployment environments spanning **AWS, Azure, GCP, on-premises, hybrid infrastructure, and Docker**, with applications deployed across app servers including **JBoss EAP and WebSphere**.
Delivered platform upgrades, performance improvements, multilingual capabilities, dynamic theming, production fixes, and compatibility enhancements across **complex customer-specific technology stacks and deployment configurations**.

Projects

Tasking – Task Management SaaS **https://tasking.co.in**

Stack: React.js, Vite, Node.js, Express, MongoDB, Redis, Docker, Jenkins, Caddy
Built and deployed a **production-grade task management SaaS** with workspace-based access, RBAC, JWT authentication, Redis caching, MongoDB aggregation, and REST APIs.
Engineered the deployment pipeline using **GitHub Webhooks, Jenkins, and Docker** on a Linux VPS, with Caddy for reverse proxying and HTTPS.

Dependency Doctor – AI Developer Tool **https://dependencydoctor.in**

Stack: Next.js, React, TypeScript, Node.js, OpenAI API, REST APIs
Built and deployed an **AI-powered developer tool** that analyzes project dependencies and generates contextual guidance through the OpenAI API. Designed the **server-side AI workflow and API integration** using Next.js and TypeScript.

Developer Tools

NetworkLogger – Chrome Extension **GitHub**
Manifest V3 extension that records **fetch, XHR, sendBeacon, and form-submission** traffic for debugging.

RTL-Migrate CLI – Published npm Package **GitHub**
Node.js CLI/codemod that converts LTR CSS and CSS-in-JS properties to CSS logical properties.

Education

Maharaja Agrasen Institute of Technology Delhi **2024**
B.Tech, Information Technology *CGPA: 8.97*

Certifications & Achievements

- Rising Star Award, Newgen Software, for contributions and ownership.
- Google Prompting Essentials Specialization – Google (Coursera).
