Jatin Sharma

Delhi, India | 9958480894 | jatinsj710@gmail.com | jatinsde.tech | GitHub | LinkedIn

Profile Summary

Senior Software Design Engineer with 2+ years building NewgenONE, an enterprise low-code platform for banks and governments, across frontend, backend and platform layers. Creator of **aidevkit**, an open-source package manager for AI agents, skills and MCP servers. Strong in React, TypeScript, Spring Boot, Node.js, PostgreSQL, Redis and Docker.

Skills

Languages: JavaScript, TypeScript, Java, C++
Frontend: React.js, Next.js, Vite, Angular, Tailwind CSS, Material UI (MUI), Microfrontends, HTML5, CSS3
Backend: Node.js, NestJS, Express.js, Spring Boot, REST APIs, JWT, Cookies, CORS
Databases: PostgreSQL, MongoDB, MySQL, Oracle, Redis
DevOps & Infrastructure: Docker, Docker Compose, Jenkins, GitHub Webhooks, PM2, Linux, Caddy, Nginx, JBoss EAP
AI Tooling: Claude Code, GitHub Copilot, Codex, MCP Servers, Agent Skills, OpenAI API, LLM Structured Outputs
System Design: Caching, Rate Limiting, Reverse Proxy, Load Balancing, RBAC, Microservices, Fault Tolerance
CS Fundamentals: DSA, OOP, Operating Systems, Networking (TCP/IP, HTTP, DNS, TLS), Concurrency, Distributed Systems

Experience

Newgen Software Technologies Limited — **Noida, India**
Senior Software Design Engineer — *Jul 2026 – Present*
Software Design Engineer (SDE-2) — *Jul 2024 – Jun 2026*

- Build **NewgenONE**, Newgen's low-code platform for content, process and customer communication (ECM, BPM, CCM), used by around 500 enterprises in 79 countries across **banking, insurance and government**.
- Work across the **full stack** (React and MUI **microfrontends**, Spring Boot services, REST APIs, FreeMarker, Redis) on Workspace, Business Admin, queue and criteria management, and advanced search.
- Delivered **multilingual and RTL support**, **dynamic theming** and **platform-wide React, MUI and Java upgrades**, keeping microfrontends compatible while the product kept shipping.
- Ship features, production fixes and performance work for customer deployments on **AWS, Azure, GCP, on-premises and hybrid** setups, running **JBoss EAP and WebSphere** with Oracle, SQL Server, PostgreSQL and Redis.

Projects

aidevkit – AI Developer Platform | *TypeScript, NestJS, Next.js, Postgres, Docker, Caddy* — **aidevkit.in**

- Open-source **package manager for AI agents, skills and MCP servers**: one command installs any of them into **Claude Code, GitHub Copilot or Codex**, with a permissions preview, a lockfile and one-step rollback.
- Wrote the CLI (**aidevkit-cli** on npm) with provider adapters behind one plan, apply and rollback engine, plus JSON output and stable exit codes so coding agents can drive it.
- Built a **NestJS registry API on Postgres** and a **Next.js** discovery site with **30,000+ listings** imported from the official MCP Registry; runs in Docker Compose behind Caddy on a VPS.

Tasking – Task Management SaaS | *React, Node.js, MongoDB, Redis, Docker, Jenkins, Caddy* — **tasking.co.in**

- Built and run a **task management SaaS** with workspace-isolated, role-based access (RBAC), JWT auth with bcrypt and secure cookies, Redis caching and MongoDB aggregation.
- Own the deployment: GitHub webhooks trigger a **Jenkins** pipeline that rebuilds **Docker** containers on a Linux VPS, with **Caddy** as the only public entry point and automatic HTTPS.

Dependency Doctor – AI Developer Tool | *Next.js, TypeScript, Zod, OpenAI API* — **dependencydoctor.in**

- Upgrade plans from real data: **npm registry** versions, **OSV** vulnerabilities and semver peer-conflict checks.
- The LLM only explains and ranks those facts; its output is forced to a JSON schema and validated again with **Zod**.

Developer Tools – NetworkLogger & RTL-Migrate | *Chrome MV3, Babel, PostCSS* — **GitHub | npm**

- **NetworkLogger**: Chrome extension that records fetch, XHR and sendBeacon traffic and keeps it after tabs close.
- **RTL-Migrate** (rtl-migrate-cli on npm): codemod that moves CSS and CSS-in-JS to logical properties for RTL.

Education

Maharaja Agrasen Institute of Technology Delhi — **2024**
B.Tech, Information Technology — *CGPA: 8.97*

Awards & Certifications

- **Rising Star Award**, Newgen Software, for contributions and ownership.
- Web Dev Cohort 2026 – Chai aur Code.
